## 1 3/16" Bearings (332001)

**Affected Products:** 1 3/16" Bearings (332001)

**Affected Serial Range:** N/A

**Related Issue #:** N/A

### Issue Description:

The 1 3/16" bearings (332001) are manufactured with 7/16" mounting holes. On older (welded cabinet design) rotisserie smokers with an 1 3/16" axle the cabinet had 1/2" mounting holes for the axle bearing. The mounting holes in the axle bearings were drilled out to 1/2" to match the cabinet holes and corresponding 1/2" hardware was used to mount the bearing. On newer (panelized design) rotisserie smokers with an 1 3/16" axle the cabinet has 7/16" mounting holes for the axle bearing and uses 7/16" hardware.

### Actions Required:

To prevent the need to distinguish between smokers with 7/16" mounting holes and smokers with 1/2" mounting holes in the cabinet, and having separate part numbers for bearings with different size mounting holes, all 1 3/16" bearings will have 7/16" mounting holes and will come with necessary hardware to mount the bearing to the smoker cabinet. On smokers with 1/2" mounting holes in the cabinet the bearing will drop slightly when using 7/16" hardware, but the hole for the axle is sufficiently large enough to prevent the axle from rubbing the liner. The included hardware per bearing will be:

(2) 715001 - 7/16" - 14 x 1 1/4" Stainless steel hex head bolts

(2) 734001 - 7/16" Stainless steel lock washers

(2) 744001 - 7/16" Stainless steel hex head nuts

### Additional Comments:

### Secondary Distribution:

Service technicians within the Distributor's organization.

Service companies.
