

Products: SP-700 rail trailer
Serial Range: Beginning with P7000219
Release Date: May 2, 2017

LP Tank Assembly:

The two (2) 40 pound LP tanks are being replaced with a single 100 pound LP tank on the SP-700 rail trailer. The larger tank will better handle the demands of the 150,000 BTU/hr burner used in the SP-700. The tank is equipped with a fuel gauge to inform users when it is time to refill the tank. The new associated part numbers are:

- | | |
|------------------------------------|--------|
| 100 pound LP tank: | 601003 |
| 2-stage regulator: | 601106 |
| Gas line from regulator to tank: | 601206 |
| Gas line from regulator to smoker: | 601208 |

Additional Comments:

The list price of a SP-700 rail trailer is unaffected by the change.

Secondary Distribution:

Sales associates within the Distributor's organization.
Service technicians within the Distributor's organization.
Service companies.
