

PRODUCT BULLETIN

SPProd-007
Revision 1
March 30, 2022

Products: SP-700 rail trailer
Serial Range: Beginning with P70A0476
Release Date: March 30, 2022
Revision 1: Description of LP tank changed.

LP Tank Assembly:

Beginning with P7000219:

The two (2) 40# LP tanks are being replaced with a single 100# LP tank on the SP-700 rail trailer. The larger tank will better handle the demands of the 150,000 BTU/hr burner used in the SP-700.

Beginning with P70A0476:

The 100# LP tank is being replaced with a different size 100# LP tank on the SP-700 rail trailer due to supply chain issues. The latest 100# LP tank is taller and smaller in diameter than the previous tank. The associated mounting brackets are also changing, but the hoses and regulator remain the same.
