SPK-280 Prior to 4086
SPK-500 Prior to 9438
SPK-700 Prior to 10342

Release Date: March 24, 2023

K-Series Product Hangers

Product hangers for the models listed above have been redesigned to be similar to the product hangers in current production models. The redesign increases manufacturing efficiencies, which will reduce the lead time and list price of the hangers. The redesign also allows mobile pins and clips to be utilized with the hangers (see Product Bulletin SPProd-009.4). The new stock code for the hangers are as follows:

Model	Product Hanger
SPK-280	994033
SPK-500	994034
SPK-700	994035

Additional Comments:

Once the remaining quantity of hangers with the previous design are sold, the redesigned hanger will be the only option for the older smoker models above with rotisserie wheels that have metal hanger stubs.

The replacement Teflon (310002) and rack retainer kit (993008) remain the same as the previous design.

Secondary Distribution:

Service technicians within the Distributor's organization.

Service companies.
